OUR PROJECTS

**UAE Restaurants
and Villas**

**Lebanon Restaurants
and Residential Building**

REVIT-BIM 3D MODELING

OUR PROCESS.

PHASE 1

Project Discovery

This is where we get to know your project details, what systems you want, what brands you want to use and conduct our research and development

PHASE 2

Project Study

Our team of engineers will start to study your project and get all the drawings needed to start. Architecture, Civil and Interior Design Plans.

PHASE 3

Designing

We work with full transparency. You will be provided with weekly report, with everything done.

PHASE 4

Project Revision

The project will be revised several times with:

- The client to insure that all the details discussed earlier are done.
- The consulting firm to check any fault or occurred during the design.

We adopt an agile approach to:

- Accelerate project delivery
- Enhance ability to manage changing priorities
- Cost effective
- Increase productivity
- Maximise resources
- Improve project visibility
- Reduce project risk
- Aware of the regulations & rules

Kick-off workshop will be scheduled in which the following will be approved:

- Budget
- Timeframe
- Project management
- Project milestones
- Team responsibilities
